Professional Summary

Computer Science graduate with expertise in Full Stack Development, Machine Learning, and Generative AI. Skilled in developing AI-powered applications, intelligent automation systems, and scalable web solutions using the MERN stack and Python. Strong interest in problem-solving, modern software technologies, and building impactful real-world projects.

Education

Bachelor of Technology (B.Tech) in Computer Science Engineering
Gyan Ganga College of Technology, Jabalpur

2022 - 2026

Higher Secondary Education (Class XII)
SHSS, Gotegaon

Passout 2021

Technical Skills

- **Programming Languages:** C++, Python, JavaScript, SQL
- **Frontend Development:** HTML5, CSS3, Tailwind CSS, React.js, Next.js
- **Backend Development:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, MySQL
- **AI & Data Science:** Machine Learning, Generative AI, NLP, Predictive Modeling
- **Tools & Technologies:** Git, GitHub, GitHub Actions, Postman, Vercel
- **Cloud & Deployment:** Render, MongoDB Atlas

Experience

Full Stack Intern- Cryptch IT Solution

Aug 2025 – Sep 2025

Jabalpur, India

- Developed full-stack web applications using React, Node.js, Express, and MongoDB
- Designed responsive user interfaces and implemented interactive frontend components
- Built and integrated RESTful APIs for dynamic data handling and user interaction.
- Collaborated with the team to debug, optimize, and deploy applications for real-world use.

Projects

AI Interview System

- Developed an AI-powered mock interview platform with dynamic question generation and automated response evaluation.
- Integrated resume-based interview workflows using Generative AI APIs and speech processing features.
- Designed a scalable MERN-based architecture for real-time interview simulation and performance analytics.

Multi-Agent AI System

- Engineered a Multi-Agent AI system where AI agents collaboratively handled planning, research, and task execution..
- Implemented role-based AI orchestration using LLM APIs and intelligent workflow management techniques.
- Built a modular and scalable architecture for adaptive AI-driven automation and decision-making.

AI Stock Assistant

- Developed an AI-driven stock analysis platform with predictive analytics and intelligent market insight generation.
- Integrated machine learning models, sentiment analysis, and real-time financial data processing features.
- Designed an interactive full-stack dashboard for stock forecasting, trend visualization, and investment analysis.

Certifications

- **NPTEL** - Python for Data Science
- **NPTEL** - Fundamentals of Object Oriented Programming
- **NPTEL** - Applied Accelerated Artificial Intelligence
- **NPTEL** - Data Base Management System
- **NPTEL** - Blockchain and its Applications

Achievements

- Built AI-powered full-stack applications using Generative AI and Machine Learning.
- Interested in scalable systems, AI technologies, and intelligent automation.
- Developing real-world AI-driven projects focused on problem solving..
